

DEPRAG DCAM for Assembly of an automotive GPS system

The Machine of the Month is a DCAM unit, built for one of our European customer:

The application was a DCAM [DEPRAG Compact Assembly Module] with a Single-Spindle Screwdriving Unit, SZG-Screwfeeder and Machine Mounting Base.

A compartmented sliding tray for the Screwfeeder was integrated into the Machine Mounting Base

Feeder on compartmented sliding tray

To reduce the unit's noise level, the Machine Mounting Base, as well as the DCAM, was lined with sound absorptive padding.

This system assembles a housing cover [3 at a time] for an automotive GPS system.
