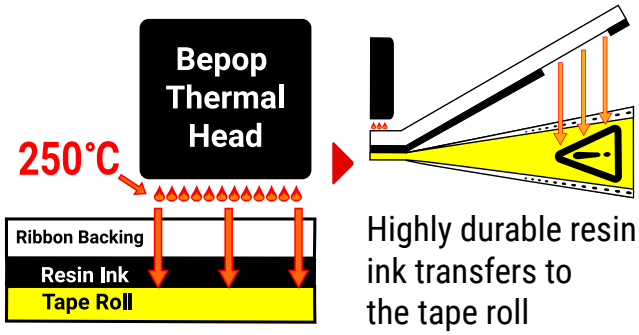
Materials designed for outdoor exposure up to 5 years

Our 5 year accelerated whether test confirms Ink ribbons and label materials are designed for exposure to UV and humidity. Designed to withstand industrial and outdoor uses.

Thermal Printing Technology

High grade resign ink ribbons are transferred and bonded onto the softened plastic (Vinyl) label material at 250°C. Thermal transfer outperforms inkjet and laser printing methods against solvents, cleaners, and UV rays.



Highly durable resin ink transfers to the tape roll
